

**JOBO GIGA Vu PRO**  
(EAN 4022124013489)

**Mobile hard drive with 40 and 60 GB and Color TFT display for professional use – ultra mobile storage system and media-player**

**GIGA Vu PRO** offers a card slot for CF I/II and Microdrive (all other flash card types via adapter) and is able to store your data and pictures permanently on a 40 or 60 GB hard drive. The device is usable with its internal Li-Ion-Battery or with AC power – infinitely mobile. **GIGA Vu PRO** offers a **4“ Color TFT display which can directly show pictures in many formats including RAW-Format**. The transfer rate of pictures (RAW, JPG, etc.) and data to the internal hard disk is extremely fast. **GIGA Vu PRO** offers an additional **Verify-Function**, which guarantees only transfer of non-damaged files to hard disk. **GIGA Vu PRO** also functions as a USB card reader and external hard disk to PC's and Mac's via the **USB 2.0 interface**. When attached to a computer you can work with your stored pictures and data. The device offers TV-Out for showing and controlling pictures directly on a TV. Even **MPEG 4, DviX** and **MP3** files can be played with video and sound so that the device works as a **Media-Player**. There is also a direct connection to printers (picture bridge) for direct printing via USB. For digital professional photographers, GIGA Vu PRO offers optimized photo functions and is also ideal as a permanent storage system for your pictures.
